**POST: MAINTENANCE ENGINEER**

**EMPLOYER: JAMAICAN HIGH COMMISSION, LONDON**

---

The Jamaican High Commission is seeking to recruit an experienced and suitably qualified Electrical Based Maintenance Engineer to provide, on a day shift position, reactive and preventative maintenance at the High Commission and the Official Residence.

## **Key Responsibilities:**

- Provide general maintenance support to ensure that all planned and preventative maintenance is carried out to required standards
- Diagnose faults, carry out remedial action or make the necessary recommendations
- Propose improvement to existing plant and equipment, in accordance with industry standards and the High Commission's needs
- Assist, as necessary, in the installation and commissioning of new equipment
- Other duties assigned, as required

## **Skills, qualifications and experienced required:**

- Full electrical apprenticeship or equivalent experience or 5-10 years working experience
- Working with and/or certification in standard boilers, heating equipment, air conditioners is essential
- Basic plumbing skills would be an asset
- Excellent inter-personal skills

## **Terms and Conditions**

Three (3) days a week for four (4) hours each day. Additional works needed to be undertaken outside this will be arranged with the Supervisor.

## **Remuneration**

Commensurate with industry regulations.

Interested applicants are invited to send cover applications and Curriculum Vitae electronically to [jamhigh@jhcuk.com](mailto:jamhigh@jhcuk.com) or mail in to the Jamaican High Commission, Attention: Deputy High Commissioner, 1-2 Prince Consort Road, London, SW7 2BZ. Applications should be submitted no later than 30 May 2014.
